

鋼鐵

RIE 2006 是什麼表面處理？

[RIE 2006](#) 是一種具潤滑效果的透明塗裝，適用於許多金屬種類。如果您需要更深入的資訊，可參考下列特點：

- Reduce galling of metal to metal contact
- Clear lubricant for Nylon insert or all metal lock nuts
- Alternative to conventional wax lubricants
- Decrease drive force when installing wood screws
- The coefficient of friction when applied over zinc plating is 0.07 +/-0.01
- Clear/Transparent
- A low film thickness buildup (threads and heads)

唯一答案 ID: #1321
